Call for Papers

The International Conference on Risks and Security of Internet and Systems 2016 will be the 11th in a series dedicated to security issues in Internet-related applications, networks and systems. Internet has become essential for the exchange of information between user groups and organizations from different backgrounds and with different needs and objectives. These users are exposed to increasing risks regarding security and privacy, due to the development of more and more sophisticated online attacks, the growth of Cyber Crime, etc. Attackers nowadays do not lack motivation and they are more and more experienced. To make matters worse, for performing attacks have become easily accessible. Moreover, the increasing complexity as well as the immaturity of new technologies such as pervasive, mobile and wireless devices and networks, raise new security challenges.

In this context, new security mechanisms and techniques should be deployed to achieve an assurance level acceptable for critical domains such as transportation, health, defence, banking, critical infrastructures, embedded systems and networks, avionics systems, etc. The CRiSIS conference offers a remarkable forum for computer and network security actors from industry, academia and government to meet, exchange ideas and present recent advances on Internet-related security threats and vulnerabilities, and on the solutions that are needed to counter them.

Scope

The topics addressed by CRiSIS range from the analysis of risks, attacks to networks and system survivability, to security models, security mechanisms and privacy enhancing technologies. The authors are invited to submit research results as well as practical experiment or deployment reports. Industrial papers about applications or case studies are also welcomed in different domains (e.g., telemedicine, banking, e-government, e-learning, e-commerce, critical infrastructures, mobile networks, embedded applications, etc.). The list of topics includes but is not limited to:

- Analysis and management of risk
- Attacks and defenses
- Attack data acquisition and network monitoring
- Cryptography, Biometrics, Watermarking
- Dependability and fault tolerance of Internet applications
- Distributed systems security
- Embedded system security
- Empirical methods for security and risk evaluation
- Hardware-based security and Physical security
- Intrusion detection and Prevention systems
- Organizational, ethical and legal issues
- Privacy protection and anonymization
- Risk-aware access and usage control
- Security and risk assessment
- Security and risks metrics
- Security and dependability of operating systems
- Security and safety of critical infrastructures
- Security and privacy of peer-to-peer system
- Security and privacy of wireless networks
- Security models and security policies
- Security of new generation networks, security of VoIP and multimedia
- Security of e-commerce, electronic voting and database systems
- Security of social networks
- Security des systemes industriels
- Smartphone security and privacy

- Traceability, metrology and forensics
- Trust management
- Use of smart cards and personal devices for Internet applications
- Web and cloud security

Paper submission

Submitted papers must not substantially overlap with papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers must be written in English and must be submitted electronically in PDF format.

The papers that will be selected for presentation at the conference will be included in post-proceedings published by Springer in the Lecture Notes in Computer Science (LNCS) series (prior to publication the papers should be revised according to the review comments). Pre-proceedings will appear at the time of the conference.

Maximum paper length will be 16 printed pages for full papers or 6 pages for short papers, in LNCS style(<http://www.springer.de/comp/lncs/authors.html>). Authors of accepted papers must guarantee that their papers will be presented at the conference. All paper submissions will be handled through the Easy Chair conference management system:
<https://easychair.org/conferences/?conf=crisis2016>.

Call for Tutorials

We solicit tutorials on state-of-the-art technologies relevant to the conference themes. We are particularly interested in tutorials that foster knowledge exchange among the different research communities present at the conference. The intended length of each tutorial is 2 to 3 hours.

A tutorial proposal should include a brief summary and outline, specific goals and objectives, the intended audience and the expected background of the audience as well as a biographical sketch of the presenter(s). The length of tutorial proposals should not exceed 5 pages.

Tutorial proposals should be submitted to the tutorial program chair:
Esma Aimeur by email :
aimeur[at]iro[dot]umontreal[dot]ca before June xx, 2016.

Important Dates

- Submission deadline: June 10th
- Notification to Authors: July 10th
- Camera Ready: July 20th

Organization

General Chairs

Frédéric Cuppens, IMT TELECOM-Bretagne, France
Axel Lagay, INRIA, France

PC Chairs

Nora Cuppens, IMT TELECOM Bretagne, France
Jean-Louis Lanet, LHS Rennes, France

Tutorial and Publication Chair

Esma Aimeur, University of Montreal, Canada
Fabrizio Biondi, INRIA, France

Publicity Chairs

Hélène Le Boudier, INRIA, France
Said Oulmakhzoune, TELECOM Bretagne, France

Local organization Chair

Ghislaine Le Gall, TELECOM Bretagne, France

Program Committee

Luca Allodi	University of Trento
Jocelyn Aubert	Luxembourg Institute of Science and Technology
Mohammed Benattou	Université de Kenitra
Christophe Bidan	Supélec
Yu Chen	State University of New York – Binghamton
Jorge Cuellar	Siemens AG, CT T
Nora Cuppens-Boulahia	Telecom Bretagne
Simone Fischer-Hübner	Karlstad University
Simon Foley	University College Cork
Rose Gamble	Tandy School of Computer Science
Bogdan Groza	Politehnica University of Timisoara
Christos Kalloniatis	Department of Cultural Technology and Communication-University of the Aegean
Barbara Kordy	IRISA
Igor Kotenko	St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences (SPIIRA)
Jorge L. Hernandez- Ardieta	Indra
Jean-Louis Lanet	INRIA- RBA
Helene Le Boudier	INRIA-RBA
Javier Lopez	University of Malaga
Raja Natarajan	TIFR, India
Stephen Neville	University of Victoria
Claudio Pastrone	ISMB
Michael Rusinowitch	LORIA – INRIA Nancy
Ketil Stoelen	SINTEF
Belhassen Zouari	SupCom – University of Carthage
